Culture on the Brink

Gretchen Bender 1994 "This volume documents the present crisis in American urban housing policies and portrays how artists ... within the context of neighborhood organizations, have fought against government neglect, shortsighted housing policies and unfettered real estate speculation. Through essays, photographs, symposiums, architectural plans and the reproduction of works from the series of exhibitions organized by [Martha] Rosler, the book serves a number of functions: it's a practical manual for community organizing; a history of housing and homelessness in New York City and around the country; and an outline of what a human housing policy might encompass for the American city"--Back cover.

De Gruyter Handbook of Drone Warfare James Patton Rogers 2024-09-03 In 2010, 60 states had a military drone program. Today at least 113

countries and 65 non-state actors now have access to weaponized drone technologies. Alongside this, established 'drone powers' - the U.S., China, Turkey, and Iran - have expanded their own use of military drones, increasing the sale and deployment of drones around the world. In the De Gruyter Handbook of Drone Warfare, drone expert, policy adviser, and historian, Dr James Patton Rogers, brings together 37 of the world's leading voices on the growing issues of commercial and military drone technologies. From the origins of military drones in the early 1900s and the resurgence of drone use during the War on Terror, through to the global proliferation of drones across Europe, Africa, and the Middle East, this handbook explores the moral, ethical, technological, legal, military, geopolitical, social, and strategic issues at the heart of drone warfare. The first handbook of its kind, the volume also addresses Russia's offensive war against Ukraine,
