WHY THIS GUIDE WORKS WHEN OTHERS DON'T

Most study guides give you information. This one gives you a system. The 40/60 learning-to-assessment split means you build knowledge first, then test it relentlessly — because the CPB exam doesn't reward passive reading. It rewards people who can retrieve and apply knowledge under pressure. Every practice question in this guide was written to train exactly that skill. The answer explanations don't just tell you what's right. They tell you why it's right — and why every wrong answer is wrong. That distinction is what turns a practice test into a learning tool rather than just a score.

Newman's Billing and Coding Specialist Study Guide

Xaiver Newman 2012-01-01

Medical coding professionals provide a key step in the medical billing process. Every time a patient receives professional health care in a physician's office, hospital outpatient facility or ambulatory surgical center (ASC), the provider must document the services provided. The medical coder will abstract the information from the documentation, assign the appropriate codes, and create a claim to be paid, whether by a commercial payer, the patient, or CMS. While the medical coder and medical biller may be the same person or may work closely together to make sure all invoices are paid properly, the medical coder is primarily responsible for abstracting and assigning the appropriate coding on the claims. In order to accomplish this, the coder checks a variety of sources within the patient's medical record, (i.e. the transcription of the doctor's notes, ordered laboratory tests, requested imaging studies and other sources) to verify the work that was done. Then the coder must assign CPT codes, ICD-9 codes and HCPCS codes to both report the procedures that were performed and to provide the medical biller with the information necessary to process a claim for reimbursement by the appropriate insurance agency. This text is intended to dispel any ambiguity prior to taking your national certification. This text contains over 400 preparatory examination questions, covering ICD-9, ICD-10, Revenue cycle, Medical report extrapolation assignments, HCPCS, UB04, and CPT.
