Instructor's Guide for Medical Terminology Simplified Barbara A. Gyls 1998 Using a programmed learning format, this user-friendly, four-color book allows students to learn medical terminology at their own pace. The material is divided into small, easy-to-read units called frames. Each frame ends with a fill-in sentence or question that tests readers' understanding of the frame's content. The text begins with the basic components of medical terminology -- suffixes, prefixes, word roots, and combining forms -- and presents the material according to the major body systems.

Color Atlas of Biochemistry Jan Koolman 2011-01-01 Totally revised and expanded, the Color Atlas of Biochemistry presents the fundamentals of human and mammalian biochemistry on 215 stunning color plates. Alongside a short introduction to chemistry and the classical topics of biochemistry, the 2nd edition covers new approaches and aspects in biochemistry, such as links between chemical structure and biological function or pathways for information transfer, as well as recent developments and discoveries, such as the structures of many new important molecules. Key features of this title include:- The unique combination of highly effective color graphics and comprehensive figure legends;- Unified color-coding of atoms, coenzymes, chemical classes, and cell organelles that allows quick recognition of all involved systems;- Computer graphics provide simulated 3D representation of many important molecules. This Flexibook is ideal for students of medicine and biochemistry and a valuable source of reference for practitioners.
