Smithsonian Institution
1998-03-30 With age-
appropriate, inquiry-centered
curriculum materials and
sound teaching practices,
middle school science can
capture the interest and energy
of adolescent students and
expand their understanding of
the world around them.

Resources for Teaching Middle
School Science, developed by
the National Science Resources
Center (NSRC), is a valuable

tool for identifying and
selecting effective science
curriculum materials that will
engage students in grades 6
through 8. The volume
describes more than 400
curriculum titles that are
aligned with the National
Science Education Standards.
This completely new guide
follows on the success of
Resources for Teaching
Elementary School Science, the
first in the NSRC series of
annotated guides to hands-on,
inquiry-centered curriculum
materials and other resources
for science teachers. The
curriculum materials in the
new guide are grouped in five
chapters by scientific
area—"Physical Science, Life
Science, Environmental
Science, Earth and Space
Science, and Multidisciplinary
and Applied Science. They are
also grouped by type—"core
materials, supplementary units,
and science activity books.

Each annotation of curriculum material includes a recommended grade level, a description of the activities involved and of what students can be expected to learn, a list of accompanying materials, a reading level, and ordering information. The curriculum materials included in this book were selected by panels of teachers and scientists using evaluation criteria developed for the guide. The criteria reflect and incorporate goals and principles of the National Science Education Standards. The annotations designate the specific content standards on which these curriculum pieces focus. In addition to the curriculum chapters, the guide contains six chapters of diverse resources that are directly relevant to middle school science. Among these is a chapter on educational software and multimedia programs, chapters on books about science and teaching, directories and guides to science trade books, and periodicals for teachers and students. Another section

features institutional resources. One chapter lists about 600 science centers, museums, and zoos where teachers can take middle school students for interactive science experiences. Another chapter describes nearly 140 professional associations and U.S. government agencies that offer resources and assistance. Authoritative, extensive, and thoroughly indexed—and the only guide of its kind—Resources for Teaching Middle School Science will be the most used book on the shelf for science teachers, school administrators, teacher trainers, science curriculum specialists, advocates of hands-on science teaching, and concerned parents.
