about mathematics with confidence, to make mathematical connections relating mathematical concepts to everyday life, and to critically examine problems and arrive at solutions.

New Prospects in Direct, Inverse and Control Problems for Evolution Equations

Angelo Favini 2016-09-10 This book, based on a selection of talks given at a dedicated meeting in Cortona, Italy, in June 2013, shows the high degree of interaction between a number of fields related to applied sciences. Applied sciences consider situations in which the evolution of a given system over time is observed, and the related models can be formulated in terms of evolution equations (EEs). These equations have been studied intensively in theoretical research and are the source of an enormous number of applications. In this volume, particular attention

is given to direct, inverse and control problems for EEs. The book provides an updated overview of the field, revealing its richness and vitality.

Encyclopedia of Library and Information

Science Allen Kent 1986-09-23 "The Encyclopedia of Library and Information Science provides an outstanding resource in 33 published volumes with 2 helpful indexes. This thorough reference set--written by 1300 eminent, international experts--offers librarians, information/computer scientists, bibliographers, documentalists, systems analysts, and students, convenient access to the techniques and tools of both library and information science. Impeccably researched, cross referenced, alphabetized by subject, and generously illustrated, the Encyclopedia of Library and Information Science integrates the essential theoretical and practical information accumulating in this rapidly growing field."
