**Radiologic Science for Technologists** Stewart C. Bushong 2004 This popular workbook/laboratory manual is intended to help students review information and sharpen skills that are essential to becoming a competent radiographer. The workbook is divided into worksheets that complement the material covered in the text. Suitable for homework or in-class assignments, the workbook contains worksheets, crossword puzzles, laboratory experiments, a math tutor section, and helpful appendices. Worksheets correspond with the five sections of the main book, covering radiologic physics, the x-ray beam, the radiographic image, special x-ray imaging, and radiation protection. Over 100 worksheets focus on particular topics from specific chapters in the text. "Bushbits" provide a concise summary of information from the textbook that is relevant to the exercise questions. Math Tutor worksheets on decimal and fractional timers, fraction/decimal conversion, solving for desired mAs, and technique adjustments provide an excellent refresher or additional practice with relevant math concepts. Laboratory Experiments provide the framework for experiments in the lab setting, designed to aid in understanding via hands-on experience.

**Radiologic Science** Stewart C. Bushong 2001-04 This companion to Bushong's RADIOLOGIC SCIENCE FOR TECHNOLOGISTS textbook features the same comprehensiveness as the text. The first of three main sections consists of worksheets organized by textbook chapter that allow students to work through the main topics of radiologic science. Suitable as either homework or an in-class assignment, these worksheets can be completed with reference to the text if needed.

**The Chemistry Classroom** James Dudley Herron 1996 Aimed at chemists who teach at the high school and introductory college level, this valuable resource provides the reader with a wealth of knowledge and insight into Dr. Herron's experiences in teaching and learning chemistry. Using specific examples from chemistry to illustrate principles of learning, the volume applies cognitive science to teaching chemistry and explores such topics as how individuals learn, teaching problem solving, concept learning, language roles, and task involvement. Includes learning exercises to help educators decide how they should teach.

**Successful ICT Projects in Excel** Pat M. Heathcote 2002 Excel is a powerful and versatile spreadsheet program which is eminently suitable for project work at every level from GNVQ (e.g. AVCE I.T. Units 3 and 13) to degree work. This book is also invaluable for staff development, and caters for users of Excel 2002, 2000 and 97.

**Spreadsheet Chemistry** O. Jerry Parker 1991

**Spreadsheets for Chemists** Gordon Filby 1995 A practical guide 'Spreadsheets for Chemists' shows chemists of all levels how to use spreadsheet programs in their daily work. It highlights the possibilities provided by Lotus 1-2-3, the most widely used spreadsheet program in the sciences. Apart from hundreds of example fragments, it features: \* Detailed discussion of the most relevant functions and all the () macro commands. \* An accompanying diskette containing 57 worksheets involving many different fields of chemical research and teaching. \* An extensive glossary of spreadsheet terms. \* Three appendices covering 1-2-3's competitors and add-in packages, the use of Windows-based spreadsheets and how what-if analysis and back-solving is applied. Although the disk examples were developed for Lotus 1-2-3 DOS Versions 2.x (x=2-4), the worksheets are compatible with the newer Windows versions and those of their main competitors, Borland's Quattro Pro and Microsoft's Excel. Several compatible spreadsheets (AsEasyAs, Proqube) might also be as used as inexpensive alternatives. The author is a senior scientist at the Nuclear Research Centre in Karlsruhe, Germany. He has been using spreadsheet software for nearly ten years successfully in a variety of chemical problems.

**First Year Chemistry Students' Conceptions of Acid/base**

**Chemistry** Sally Diane Rupert 2001

**Chemistry (Teacher Guide)** Dr. Dennis Englin 2018-02-26 This book was created to help teachers as they instruct students through the Master's Class Chemistry course by Master Books. The teacher is one who guides students through the subject matter, helps each student stay on schedule and be organized, and is their source of accountability along the way. With that in mind, this guide provides additional help through the laboratory exercises, as well as lessons, quizzes, and examinations that are provided along with the answers. The lessons in this study emphasize working through procedures and problem solving by learning patterns. The vocabulary is kept at the essential level. Practice exercises are given with their answers so that the patterns can be used in problem solving. These lessons and laboratory exercises are the result of over 30 years of teaching home school high school students and then working with them as they proceed through college. Guided labs are provided to enhance instruction of weekly lessons. There are many principles and truths given to us in Scripture by the God that created the universe and all of the laws by which it functions. It is important to see the hand of God and His principles and wisdom as it plays out in chemistry. This course integrates what God has told us in the context of this study. Features: Each suggested weekly schedule has five easy-to-manage lessons that combine reading and worksheets. Worksheets, quizzes, and tests are perforated and three-hole punched — materials are easy to tear out, hand out, grade, and store. Adjust the schedule and materials needed to best work within your educational program. Space is given for assignments dates. There is flexibility in scheduling. Adapt the days to your school schedule. Workflow: Students will read the pages in their book and then complete each section of the teacher guide. They should be encouraged to complete as many of the activities and projects as possible as well. Tests are given at regular intervals with space to record each grade. About the Author: DR. DENNIS ENGLIN earned his bachelor's from Westmont College, his master of science from California State University, and his EdD from the University of Southern California. He enjoys teaching animal biology, vertebrate biology, wildlife biology, organismic biology, and astronomy at The Master's University. His professional memberships include the Creation Research Society, the American Fisheries Association, Southern California Academy of Sciences, Yellowstone Association, and Au Sable Institute of Environmental Studies.

**Workbook for Radiologic Science for Technologists - E-Book** Elizabeth

Shields 2012-06-22 Sharpen your radiographic skills and reinforce what you've learned in Bushong's Radiologic Science for Technologists, 10th Edition. Corresponding to the chapters in the textbook, this workbook helps you learn by doing worksheets, crossword puzzles, and math exercises. A Math Tutor section helps you brush up on your math skills. You'll gain the scientific understanding and practical experience necessary to become an informed, confident radiographer. In-depth coverage lets you review and apply all of the major concepts from the text. Over 100 worksheets make it easy to review specific topics, and are numbered according to textbook chapter. Math Tutor exercises provide a great refresher for beginning students or extra practice with decimal and fractional timers, fraction/decimal conversion, solving for desired mAs, and technique adjustments. Penguin boxes summarize relevant information from the textbook, making it easier to review major concepts and do worksheet exercises. New worksheets on digital radiographic technique and the digital image display provide an excellent review of the new textbook chapters. Closer correlation to the textbook simplifies your review.
