Women Educators in the Progressive Era A. Durst 2010-07-19 In 1896, John Dewey established the Laboratory School at the University of Chicago - an experimental school designed to test his ideas in the reality of classroom practice. Through a collective portrait of four of the school's teachers *Women Educators in the Progressive Era* examines the struggles and satisfactions of teaching at this innovative school, and situates the school community in the context of Progressive Era experimental impulses in Chicago and the nation. This book reassesses the implications of Dewey's ideas for current efforts to improve schools, as it explores how the Laboratory School teachers participated in inquiry designed to advance educational thought and practice.

Epic Conflicts Jason A. McCloskey 2007 This dissertation explores the political and cultural functions of digressive classical mythological

episodes in two early modern Spanish and two Colonial Spanish American epic poems: Juan Boscan's *Leandro* (1543), Alonso de Ercilla's *La Araucana* (1569, 78, 89), Lope de Vega's *Jerusalen conquistada* (1609), and Juan de Miramontes's *Armas antarticas* (1608-09). Beyond the brief mythological allusions typical of many Hispanic epics of the day, these four works include sustained episodes of classical mythology that only indirectly relate to the main plots of the poems. I argue that these mythical passages serve essential roles in the epics by foreshadowing, recasting, and emphasizing certain significant ideas and actions of the works. In doing so, I contend that the mythological interpolations contribute to the epics' celebration and embellishment of the artistic, military, and colonial endeavors of the Spanish Empire of the sixteenth and seventeenth centuries. This focus allows me to examine issues of poetic imitation, the relation between visual artwork and the poetic texts, as well as the social tensions that often characterize epic poetry of early modern Spain and Colonial Spanish America.

Diplomatic Style and Foreign Policy Jeffrey Robertson 2016-05-20

The book explores diplomatic style and its use as a means to provide analytical insight into a state's foreign policy, with a specific focus on South Korea. Diplomatic style attracts scant attention from scholars. It is dismissed as irrelevant in the context of diplomacy's universalism; misconstrued as a component of foreign policy; alluded to perfunctorily amidst broader considerations of foreign policy; or wholly absented from discussions in which it should comprise an important component. In contrast to these views, practitioners maintain a faith-like confidence in diplomatic style. They assume it plays an important role in providing analytical insight, giving them advantage over scholars in the analysis of foreign policy. This book explores diplomatic style and its use as a means to provide analytical insight into foreign policy, using South Korea as a

case study. It determines that style remains important to diplomatic practitioners, and provides analytical insight into a state's foreign policy by highlighting phenomena of policy relevance, which narrows the range of information an analyst must cover. The book demonstrates how South Korea's diplomatic style - which has a tendency towards emotionalism, and is affected by status, generational change, cosmopolitanism, and estrangement from international society - can be a guide to understanding South Korea's contemporary foreign policy. This book will be of much interest to students of diplomacy studies, foreign policy, Asian politics, and International Relations in general.

Non-State Actors in Diplomacy Farkhondeh Akbari 2025-11-12 This book examines which characteristics allow a non-state armed actor to be considered an effective diplomatic actor for the purpose of a meaningful peace settlement. The work demonstrates how such characteristics can potentially contribute to a more successful outcome in peacemaking initiatives with non-state armed actors, and how their absence can become a peril for peace. Addressing a gap in the diplomatic studies literature, the book is concerned with defining, characterising and categorising the effectiveness of diplomatic actors. It argues that the critical characteristics are autonomy, organisational coherence and representativeness, all of which non-state armed actors need to possess to a sufficient degree if they are to engage in meaningful negotiations which could lead to a sustainable peace settlement. The empirical data are drawn from analysis of the diplomatic engagements with the Khmer Rouge that led to 1991 Paris Peace Agreements in relation to the Cambodian conflict and from exploration of the difficulties experienced in attempting to negotiate a peace settlement with the Taliban in Afghanistan. The book's detailed analysis of these two case studies demonstrates the value of the diplomatic actors' framework. This book will be of much interest to students of diplomacy studies, peace studies, Asian studies and international relations.
