The Cellular Stress Response and Physiological Adaptations of Corals Subjected to Environmental Stressors and Pollutants, volume II Davide Seveso

2024-09-06 Given the success of the first edition of The Cellular Stress Response and Physiological Adaptations of Corals Subjected to Environmental Stressors and Pollutants and the continuing advances in the field, we are pleased to announce the Volume II. Coral reefs are among the most biologically diverse and economically important ecosystems on the planet, providing several ecosystem services that are vital to humans. However, the health of corals worldwide is seriously threatened by a multitude of factors. Biotic stressors, such as predation outbreaks and epizootic diseases, and

abiotic factors, including abnormally elevated and low sea temperatures, ocean acidification, high UV radiations, changes in salinity, are increasing the occurrence of local and mass coral bleaching events. Additionally, anthropogenic activities such as industrial pollution, coastal development, nutrient input, and recreational activities are leading to further reef degradation and mortality around the world.

Treatise on Process Metallurgy Roderick Guthrie 2024-01-25 Treatise on Process Metallurgy: Volume One, Process Fundamentals provides academics with the fundamentals of the manufacturing of metallic materials, from raw materials into finished parts or products. In these fully updated volumes, coverage is expanded into four volumes, including Process Fundamentals, encompassing process

fundamentals, structure and properties of matter; thermodynamic aspects of process metallurgy, and rate phenomena in process metallurgy; Processing Phenomena, encompassing interfacial phenomena in high temperature metallurgy, metallurgical process phenomena, and metallurgical process technology; Metallurgical Processes, encompassing mineral processing, aqueous processing, electrochemical material and energy processes, and iron and steel technology, non-ferrous process principles and production technologies, and more. The work distills the combined academic experience from the principal editor and the multidisciplinary four-member editorial board. - Provides the entire breadth of process metallurgy in a single work - Includes in-depth knowledge in all key areas of process metallurgy - Approaches the topic from an interdisciplinary perspective, providing broad range coverage on topics

Bridging the Gap Between Policy and Science in Assessing the Health Status of Marine Ecosystems, 2nd Edition Angel Borja 2017-03-22
Marine management requires approaches which bring together the best research from the natural and social sciences. It requires stakeholders to be well-informed by science and to work across administrative and geographical boundaries, a feature especially important in the inter-connected marine environment. Marine management must ensure that the natural structure and functioning of ecosystems is maintained to provide ecosystem services. Once those marine ecosystem services have been created, they deliver societal goods as long as society inputs its skills, time, money and energy to gather those benefits. However, if societal goods and benefits are to be limitless, society requires appropriate administrative, legal and management mechanisms to ensure that the use of such benefits do not impact on environmental quality, but instead support its sustainable use.

Yearbook of International Organizations

2014-2015 (Volume 4) Union of International Associations 2014-09-17 The Yearbook of International Organizations provides the most extensive coverage of non-profit international organizations currently available. Detailed profiles of international non-governmental and intergovernmental organizations (IGO), collected and documented by the Union of International Associations, can be found here. In addition to the history, aims and activities of international organizations, with their events, publications and contact details, the volumes of the Yearbook include networks between associations, biographies of key people involved and extensive statistical data. Providing both an international organizations and research bibliography, Volume 4 cites over 46,000 publications and information resources supplied by international organizations, and provides nearly 18,000 research citations under 40 subject headings. This volume also includes a research

bibliography on international organizations and transnational associations.

substance available anywhere. Casarett & Doull's Toxicology: The Basic Science of Poisons, Ninth Edition is logically divided into seven sections: General Principles of Toxicology Disposition of Toxicants Non-Organ Directed Toxicity Target Organ Toxicity Toxic Agents Environmental Toxicology Applications of Toxicology Many new contributors capture the progress made in toxicology over the past few years: This edition is markedly updated from the previous edition, with more than one-third of the chapters authored by scientists who have not made previous contributions to the book. Sharing their expertise, they deliver dynamic new coverage of the importance of apoptosis, autophagy, cytokines, growth factors, oncogenes, cell cycling, receptors, gene regulation, protective mechanisms, repair mechanisms, transcription factors, signaling pathways, transgenic mice, knock-out mice, humanized mice, polymorphisms, microarray technology, second-generation sequencing,

genomics, proteomics, epigenetics, exposome, microbiota, read across, adverse outcome pathways, high-content screening, computational toxicology, innovative test methods, and organ-on-a-chip in understanding the mechanisms of toxicity and the regulation of chemicals. A true "essential" If you are in need of an up-to-date, all-in-one overview of the biomedical and environmental aspects of toxicology - written by experts, and presented in full color, your search ends here.

Solar Cells Development and Fabrication Shivani Dhall 2025-05-19 This book covers the basic scientific background of solar cells, their principles, working, growth, operating parameters, commercialization status, manufacturing challenges, and future scope of solar cells. Topics covered range from history and developments of solar cell generation to market growth and different applications of solar cells including in depth knowledge about Si, PSCs, and next generation multilayer bandgap based solar cells and their fabrication techniques with advanced methodology. Key features: Explains solar cells and their growth at different stages Discusses challenges in the fabrication/commercialization of solar cells at the lab and industry levels Combines fundamental, experimental, and theoretical knowledge with industrial needs and engineering design methods Covers the new generation of perovskite solar cells and their synthesis techniques Explores multilayer graded

bandgap solar cells and their importance in existing solar technology This book is specifically designed for graduate students and researchers in solar energy technology, cell device, and materials science.

Differential Evolution: From Theory to Practice B. Vinoth Kumar 2022-01-25 This book addresses and disseminates state-of-the-art research and development of differential evolution (DE) and its recent advances, such as the development of adaptive, self-adaptive and hybrid techniques. Differential evolution is a population-based meta-heuristic technique for global optimization capable of handling non-differentiable, non-linear and multi-modal objective functions. Many advances have been made recently in differential evolution, from theory to applications. This book comprises contributions which include theoretical developments in DE, performance comparisons of DE, hybrid DE approaches, parallel and distributed DE for multi-objective optimization,
