Teaching on Solid Ground Thomas M. McCann 2019-01-09 To be successful, teachers of English in grades 6-12 need more than basic content knowledge and classroom management skills. They need a deep understanding of the goals and principles of teaching literature, writing, oral discourse, and language in order to

make sound instructional decisions. This engaging book explores the pedagogical foundations of the discipline and gives novice and future teachers specific guidance for creating effective, interesting learning experiences. The authors consider such questions as what makes a literary text worth studying, what students gain from literary analysis, how to make writing meaningful, and how to weave listening and speaking into every class meeting. Professional learning and course use are facilitated by end-of-chapter reflection questions, text boxes, and appendices showcasing exemplary learning activities.

Logic of Alice Bernard M. Patten 2009 In this unique approach to the 'Alice' phenomenon of Lewis Carroll, the author makes clear that far from being just an entertaining children's book, the Wonderland Adventures are more complex and deeply reflective of Lewis Carroll's character.

The Literary World 1887

Teaching to Change the World Jeannie Oakes 2018-01-29 Teaching to Change the World is an up-to-the-moment, engaging, social justice-oriented introduction to education and teaching, and the challenges and opportunities they present. Both foundational and practical, the chapters are organized around conventional topics but in a way that consistently integrates a coherent story that explains why schools are as they are. Taking the position that a hopeful, democratic future depends on ensuring that all students learn, the text pays particular attention to inequalities associated with race, social class,

language, gender, and other social categories and explores teachers' role in addressing them. This thoroughly revised fifth edition remains a vital introduction to the profession for a new generation of teachers who seek to become purposeful, knowledgeable practitioners in our ever-changing educational landscape—for those teachers who see the potential for education to change the world. Features and Updates of the New Edition: • Fully updated Chapter 1, "The U.S. Schooling Dilemma," reflects our current state of education after the 2016 U.S. presidential election. • First-person observations from teachers, including first-year teachers, continue to offer vivid, authentic pictures of what teaching to change the world means and involves. • Additional coverage of the ongoing effects of Common Core highlights the heated public discourse around teaching and teachers, and charter schools. • Attention to diversity and inclusion is treated as integral to all chapters, woven throughout rather than tacked on as separate units. • "Digging Deeper" resources on the new companion website include concrete resources that current and future teachers can use in their classrooms. • "Tools for Critique" provides instructors and students questions, prompts, and activities aimed at encouraging classroom discussion and particularly engaging those students least familiar with the central tenets of social justice education.

The Heart and Mind in Teaching Alyssa Magee Lowery 2014-07-30 *The Heart and Mind in Teaching: Pedagogical Styles Through the Ages* provides an important historical context for an issue confronting every American teacher, administrator, student, parent, and citizen. As the art of teaching is rapidly replaced by formulas, clinical studies, and one-size-fits-all scientific pedagogy, it is important to ask the question, "How did we get here?" Authors Alyssa Magee Lowery and William Hayes trace the history of teaching from Greek philosophy to twenty-first century educational issues in an effort to provide some perspective in the long art versus science debate, ultimately finding that the two components may be able to coexist peacefully.

Complete Lessons From Augustine of Hippo

Zoenaedy Soenjoto 2026-04-10 This book presents a clear and accessible introduction to the life, works, and enduring influence of Augustine of Hippo, one of the most important thinkers in Christian history. It begins with his personal journey—from a brilliant but restless seeker of truth, shaped by competing philosophies and moral struggles, to a transformed believer whose conversion marked a decisive turning point in his life. The core of the book explores Augustine's major writings, especially *Confessions* and *The City of God*. In *Confessions*, Augustine reveals the inner drama of the human soul—restless, searching, and ultimately finding peace only in God. Themes such as disordered love (*ordo amoris*), grace, memory, and time are explained in practical and relatable ways. *The City of God* contrasts two ways of living: one centered on self-love and earthly power, and the other on the love of God and eternal truth, offering a framework for understanding history, politics, and human destiny. The book also examines Augustine's teachings on Scripture, the Trinity, free will, and grace. It highlights his strong emphasis on the necessity of divine grace over human effort, his understanding of evil as a lack of good rather than a created force, and his vision of faith working together with reason. Finally, the book brings Augustine into the modern world by applying his insights to contemporary life—addressing issues such as identity, anxiety, moral confusion, and spiritual longing. It shows that Augustine's central message remains deeply relevant: the human heart will remain restless until it finds its rest in God.
